

AUTOMATIC LOADERS

Features

- Carbon Steel Contact Surfaces
- Single phase brushless motor
- Loading time control
- Pause control feature
- Visual alarm for material low level
- Hinged lid with airtight design and two clamping points
- Bypass motor cooling system
- Magnetic level switch for intelligent loading of material
- Motor protective device - ensures against overloading

User Interface

- Easy installation:
 - Loader outlet does not protrude into blender reservoir hopper
 - Fully directional mounting flange makes installation quick and simple
- Effortless dismantling:
 - Quick release inspection mechanism for easy access
 - Easy dismantling for accessing the Auto Loader without tools
- Easy Cleaning:
 - Automatic filter cleaning and material blow-down by compressed air pulse
 - Filter can be replaced in seconds without tools

As material loading is an integral part of every production process, minimal disruption of material flow with complete control is essential. TSM offers a range of reliable and user friendly Automatic Loaders to serve your material handling needs. Our stand alone Automatic Vacuum Loaders provide fast and accurate materials handling with minimal effort.
